

*The National Cyber League - Where Cybersecurity is a Passion*

## NCL 2019 Fall Individual Game Scouting Report

Dear Matthew Hier,

Congratulations on a great NCL 2019 Fall Individual Game!

### National Cyber League (NCL)

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills. The NCL is a next-generation learning and gaming environment using high-fidelity and scenario-based challenges from Cyber Skyline. The challenges are designed around industry recognized and performance-based exam objectives to further develop student skills. Learn more about the NCL at [www.nationalcyberleague.org](http://www.nationalcyberleague.org). If you have any questions regarding the information in this report please inquire at [info@nationalcyberleague.org](mailto:info@nationalcyberleague.org).

### NCL 2019 Fall Season

The NCL 2019 Fall Season was designed to develop and validate player knowledge and skills in preparation for further learning, career readiness, industry certifications, and other cybersecurity competitions. Hosted challenges in the NCL Gymnasium were made available to all players and coaches and aligned to the games. The games were designed around performance-based exam objectives of the CompTIA Security+™ and EC-Council Certified Ethical Hacker (CEH) certifications.

The NCL 2019 Fall Season began with the Preseason round to group players into one of three competition brackets based on skill level: Gold (top 15% of all players nationally - 606 players), Silver (the next 35% of all players nationally - 1,450 players) or Bronze (the next 50% of all players nationally - 2,092 players). Players who did not participate in the Preseason were not bracketed or ranked. This made the Individual Game more engaging by grouping players with similar knowledge and skill levels.

At the beginning of the NCL 2019 Fall Season, 5,759 students/players and 403 faculty/coaches from more than 400 two- and four-year schools across all 50 U.S. states registered to play.

The NCL 2019 Fall Season was powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for all players to compete and track their progress in real-time.

*The National Cyber League - Where Cybersecurity is a Passion*

The Individual Game (formerly Regular Season) Capture the Flag (CTF) event took place from November 1 through November 3. The Team Game (formerly Postseason) CTF event took place from November 15 through November 17. The games were conducted in real-time for students across the country.

## NCL Scouting Report

What follows is a customized NCL Scouting Report of your performance in the NCL 2019 Fall Individual Game. We hope you find it to be valuable in both confirming your skills and identifying areas for improvement. In addition, the NCL Scouting Report can be used as part of any job application, as it provides an external validation of skills as demonstrated in competitive gameplay based on industry-recognized certification performance-based exam objectives.

The following definitions apply to your performance across a range of games, optimized for individuals:

- **Bracket Rank:** overall place within the Bracket
- **National Rank:** overall place with respect to all players, across all Brackets
- **Score:** total combined flag points; the higher the score, the higher the ranking
- **Flag Captures:** the combined number of successful flag captures/submissions
- **Flag Attempts:** the combined number of flags submitted to the Cyber Skyline Platform
- **Accuracy:** percentage of flag submissions that were correct. Formula: Total Flag Captures divided by Total Flag Attempts

## NCL Fall 2019 Preseason

102 flags (1,845 points)

On average, players captured 51 flags, 612 points, and had an accuracy of 65.31%.

National Rank	Score	Flag Captures	Flag Attempts	Accuracy
78 / 5,220	1,595	96	129	74.42%

Based on the Preseason performance, **Matthew Hier** was placed into the **Gold Bracket** for the Individual Game.

*The National Cyber League - Where Cybersecurity is a Passion*

## NCL Fall 2019 Individual Game

144 flags (3,000 points)

On average, players captured 53 flags, 826 points, and had an accuracy of 66.82%.

Gold Bracket players, on average, captured 90 flags and scored 1,540 points with an accuracy of 73.05%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
97 / 4,149	94 / 606	2,155	121	144	84.03%

## Individual Game Competencies

The following tables show the player's rank Nationally and by Bracket, based on the following modules:

### 1. Cryptography

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

### 2. Enumeration and Exploitation

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

### 3. Log Analysis

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

### 4. Network Traffic Analysis

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

### 5. Open Source Intelligence

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

### 6. Password Cracking

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

### 7. Scanning & Recon

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

### 8. Web Application Exploitation

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

### 9. Wireless Access Exploitation

Identify the security posture of wireless networks from network captures.

## Cryptography

13 flags (375 points)

On average, players in this module captured 7 flags and scored 156 points with an accuracy of 86.98%.

Gold Bracket players, on average, captured 10 flags and scored 260 points with an accuracy of 91.55%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
132 / 4,149	112 / 606	335	12	12	100.00%

## Enumeration and Exploitation

12 flags (285 points)

On average, players in this module captured 3 flags and scored 45 points with an accuracy of 33.23%.

Gold Bracket players, on average, captured 5 flags and scored 106 points with an accuracy of 47.93%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
61 / 4,149	57 / 606	235	11	13	84.62%

## Log Analysis

18 flags (455 points)

On average, players in this module captured 7 flags and scored 149 points with an accuracy of 51.80%.

Gold Bracket players, on average, captured 12 flags and scored 270 points with an accuracy of 62.95%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
393 / 4,149	274 / 606	255	12	13	92.31%

## Network Traffic Analysis

19 flags (435 points)

On average, players in this module captured 9 flags and scored 165 points with an accuracy of 60.41%.

Gold Bracket players, on average, captured 13 flags and scored 230 points with an accuracy of 64.72%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
60 / 4,149	55 / 606	310	16	26	61.54%

### Open Source Intelligence

23 flags (255 points)

On average, players in this module captured 17 flags and scored 184 points with an accuracy of 75.78%.

Gold Bracket players, on average, captured 22 flags and scored 237 points with an accuracy of 84.16%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
98 / 4,149	59 / 606	255	23	24	95.83%

### Password Cracking

19 flags (305 points)

On average, players in this module captured 9 flags and scored 113 points with an accuracy of 89.19%.

Gold Bracket players, on average, captured 13 flags and scored 170 points with an accuracy of 92.71%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
44 / 4,149	34 / 606	220	17	17	100.00%

### Scanning & Recon

15 flags (250 points)

On average, players in this module captured 5 flags and scored 70 points with an accuracy of 55.96%.

Gold Bracket players, on average, captured 8 flags and scored 109 points with an accuracy of 66.17%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
30 / 4,149	29 / 606	170	12	12	100.00%

### Web Application Exploitation

11 flags (335 points)

On average, players in this module captured 2 flags and scored 29 points with an accuracy of 41.05%.

Gold Bracket players, on average, captured 3 flags and scored 58 points with an accuracy of 53.74%.

National Rank	Gold Bracket Rank	Score	Flag Captures	Flag Attempts	Accuracy
150 / 4,149	118 / 606	70	4	8	50.00%
